Diagram illustrating a second embodiment of the device. It features a similar structure to the first embodiment, with a main body (60d) and a lower section (61d). The lower section is connected to a base (64d) which includes a series of small protrusions (6d) and a curved section (7d). The base is further connected to a side structure (14d) and a top structure (15d). The top structure is labeled 63d, and the side structure is labeled 62d.
